

## The most comprehensive Point-of-Care Ultrasound simulator yet

Upgrade your system to the latest technology with increased realism, expanded scanning regions, and even more pathologies - and get even more from your BodyWorks system.

### More realistic

Scan further, in higher fidelity and increased definition - BodyWorks 4.0 includes 'wrap-around' ultrasound scanning for increased realism.

### More comprehensive

BodyWorks 4.0 includes expanded access to patient-based scenario training with 6 new pathologies and 3 new protocols.

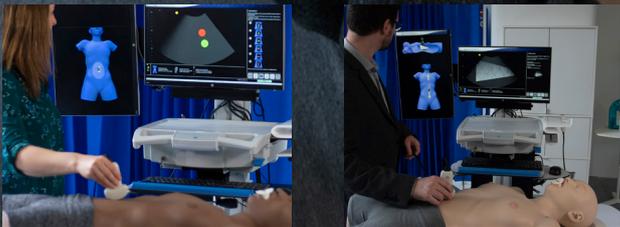

### More learning

Get even more from your existing system with increased learning opportunities in PoCUS and emergency medicine.

## Basic Skills Modules

The BodyWorks 4.0 basic skills add-on provides 3 modules to develop probe manipulation, hand eye coordination and image interpretation in a safe environment.

## Probe Manipulation

Learn the fundamental probe movements, hand-eye coordination and ultrasound terminology through simple, step-by-step lessons and quizzes.

## Scanning Windows

Explore the standard scanning windows for each anatomical area, and learn the relevant sono-anatomy with simple colour-coded highlighting.

## Anatomy Viewer

Understand how the ultrasound image correlates to the main anatomical structures. Explore sono-anatomy by slicing through the virtual body and see how this correlates to the ultrasound image in real-time.
